PROFESSIONAL SUMMARY

Senior .NET Backend Developer with 6+ years of experience in C#, .NET, ASP.NET Core, SQL Server, microservices, Clean Architecture, CQRS, REST APIs, Keycloak, JWT, RabbitMQ and Kafka. Experienced in production performance optimization, including approximately 35% improvement in API/SQL performance. Also building AI-powered backend systems with RAG, LLM APIs, embeddings, semantic search and ChromaDB.

TECHNICAL SKILLS

- C#, .NET 8, ASP.NET Core, Entity Framework, Dapper, RESTful APIs
- Clean Architecture, CQRS, Microservices, Multi-Tenant Architecture
- SQL Server, T-SQL, PostgreSQL, MongoDB, MySQL, Redis
- RabbitMQ, Apache Kafka, Quartz
- Keycloak, IdentityServer/Duende, JWT, OAuth2, OIDC, CORS
- Docker, Kubernetes, Nginx, Linux, ELK Stack, Git
- Python, FastAPI, RAG, LLM APIs, Embeddings, Semantic Search, ChromaDB
- TypeScript, JavaScript, React, Blazor WebAssembly, .NET MAUI, Web3.js

PROFESSIONAL EXPERIENCE

Senior .NET Backend Developer | *Rasta Novin Aria* | *Tehran, Iran* | *Apr 2025 – May 2026*

- Designed and developed backend services and RESTful APIs using .NET 8 as part of the core engineering team.
- Improved production SQL query and API performance by approximately 35% through targeted query optimization and architectural refinements.
- Implemented distributed authentication and authorization using Keycloak and JWT across services.

Senior Backend Developer | *Seigh Fara Ofogh* | *Tehran, Iran* | *Oct 2024 – Mar 2025*

- Applied Clean Architecture principles to improve maintainability, testability, and long-term scalability.
- Led migration of a monolithic application toward a microservices-based architecture, improving deployment flexibility and resilience.
- Implemented Keycloak-based authentication for secure inter-service and user-facing communication.

Senior Backend Developer — Freelance | *Self-Employed* | *Pakdasht, Iran* | *Jul 2023 – Oct 2024*

- Built multi-tenant APIs enabling multiple client organizations to operate securely on shared infrastructure.
- Developed blockchain-based applications for client projects using Web3 technologies.
- Designed and implemented scalable backend systems following modern architecture and engineering practices.

.NET Backend Developer | *Behineh Kavan Keyfiat* | *Tehran, Iran* | *Jul 2021 – Jul 2023*

- Contributed to the design, development, and maintenance of backend services and RESTful APIs using .NET and SQL Server.

Back-End Developer — Freelance | *Self-Employed* | *Tehran, Iran* | *Mar 2020 – Jul 2021*

- Delivered backend development services for client projects using .NET and SQL Server.

SELECTED AI PROJECT

RAG API — Retrieval-Augmented Generation System | [GitHub Repository](#)

- Built an OpenAI-compatible RAG API integrating document embeddings, ChromaDB vector storage, semantic search, and LLM chat generation.
- Implemented OpenRouter and OpenAI-compatible chat providers with independent embedding-provider abstraction.
- Built a separate local embedding microservice using FastAPI/Uvicorn and xmanii/maux-gte-persian for Persian-language embeddings.
- Implemented collection initialization, document ingestion, semantic search, and streaming/non-streaming chat responses.

EDUCATION

- Diploma

CERTIFICATIONS & TRAINING

- Machine Learning with Python — Maktabkhooneh (2026)
- Microservice Architecture — Nikamooz, 70 hours (2023)
- PRO .NET Ecosystem — Nikamooz, 110 hours (2022)
- ASP.NET MVC — Cando Academy (2019)
- Programming Fundamentals — Cando Academy (2019)

LANGUAGES

- Persian — Native | English — Upper Intermediate

ADDITIONAL

- Military Service — Completed
